SELF-ASSESSMENT FORM
for Published Scientific Papers
Table 1. Scientific Articles

In the table below:

For category 1) of articles: “i” lists the articles presenting original scientific contributions, in extenso, published by the candidate, as author or co-author, in ISI rated journals;

“a_i” represents the absolute influence score (www.eigenfactor.org) of the scientific journal in which article i was published, corresponding to the year when the article was published (when the publishing year comes before the dates existing in the database the closest year shall be chosen);

n_i^{ef} represents the actual number of authors of publication i, which is calculated as follows:

n_i	if $n_i \leq 5$
$(n_i + 5)/2$	if $5 < n_i \leq 15$
$(n_i + 15)/3$	if $15 < n_i \leq 75$
$(n_i + 45)/4$	if $n_i > 75$

In the case of High Energy and Elementary Particle Physics publications with a large number of authors, if the article is based on an internal note of the collaboration to which the candidate is co-author, then n_i is given by the number of authors in the internal note.

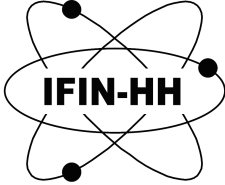

For category 2) of articles: “i” lists the articles presenting original scientific contributions, in extenso, published in ISI rated journals for which the candidate is first author or correspondent author. The articles whose authors are indicated in the alphabetical order of their name and to which the candidate is first author exclusively due to his/her name and the alphabetical order shall not be taken into consideration.

In the case of publications in the field of High Energy and Elementary Particle Physics with a large number of authors, if the article is based on an internal note of the collaboration whose content has been approved for publication following a seminar delivered by the candidate, then he/she is deemed first author.

Methodology for Calculating the Score on the Competition Folder Examination

For the analysis of the competition folder, a score from 1 to 10 shall be awarded for the candidate's scientific activity. The score structure is as follows:

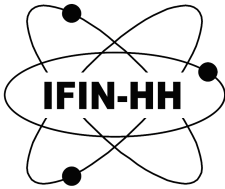

- **4 points** shall be awarded on the basis of folder assessment and the scientific prestige indicators shown in Table no. 2 below;
- **6 points** shall be awarded on the basis of the scientometric assessment according to the following relation:

$$N = 1.50 \times (1 + P/P_{\text{threshold}}) \text{ if } P < 3 \times P_{\text{threshold}}$$

$$N = 6 \text{ if } P \geq 3 \times P_{\text{threshold}}$$
